

Job Title - **Frontend Developer**

We are looking for an enthusiastic frontend developer who can convert Figma / PSD designs to responsive web pages from scratch.

Role and Responsibilities:

1. Build pages based on Figma/ PSD and custom themes.
2. Create custom sections and functionality using pure HTML, CSS, and JavaScript and ensure cross-browser compatibility.
3. Overcome technical challenges by conducting research and testing various solutions.
4. Communicate clearly with the team using internal notes.

Skill Set Required :

1. **Experience in building responsive layouts (Required)**
2. Should have an experience or portfolio in building sites from scratch
3. Comfortable working with debugging tools like Firebug, Chrome inspector, etc.
4. Ability to troubleshoot page builder limitations using HTML, CSS, and JavaScript (to limit reliance on plugins)
5. Ability to solve problems independently
6. Ability to communicate with confidence when sharing recommendations with colleague and ability to work independently in a fast-paced environment

2. **Stipend : Rs 15,000 / month** (During Internship)

3. **Package : 3.7 LPA**

4. **Job Type : In-Office**

5. **Job Location - Borivali, Mumbai**

Selection Process:

Step 1: Screening Test - After reviewing profiles, shortlisted students will be scheduled for a MCQ test which will be based on basics of C, C++, Java, Data Structure, Database, Networking along with a few logical questions.

Step 2: Candidates who clear the test will be scheduled for a Face to Face technical interview on the same day.

Step 3: Candidates who submit the assignment on time will be scheduled for Final Technical interview.
